

Diagram illustrating the MIPAC code for a 2D grid with missing cells. The code is determined by the number of missing cells (M) and the width of the grid (W).

Example 1: A 2x8 grid with missing cells at (1,4), (1,5), (2,4), and (2,5). The code is M6 W.

Example 2: A 2x10 grid with missing cells at (1,3), (1,4), (1,5), (1,6), (1,7), (1,8), (1,9), (1,10), (2,3), (2,4), (2,5), (2,6), (2,7), (2,8), (2,9), and (2,10). The code is M46 W.

Example 3: A 2x5 grid with missing cells at (1,2), (1,3), (1,4), and (1,5). The code is M52 W.

Example 4: A 2x8 grid with missing cells at (1,3), (1,4), (1,5), (1,6), (1,7), (1,8), (1,9), (1,10), (2,3), (2,4), (2,5), (2,6), (2,7), (2,8), (2,9), and (2,10). The code is M59 W.
